

## Homework 5: Combinatorial Testing

- a) List all of the 2-way (pairwise) combinations for the following input

$x_1$	$x_2$	$x_3$	$x_4$
0	3	6	9
1	4	7	10
2	5	8	11

- b) Generate a pairwise combinatorial test suite for the input above.  
No credit will be given for an exhaustive test suite.  
Also, the more test cases you generate, the fewer points you receive.
